## User Manual

Complete Feature Reference — Version 8.0

[smart-kitchen-opal.vercel.app](https://smart-kitchen-opal.vercel.app) • May 2026

### Feature Summary

| Feature                | Tier     | Description                                                                                                                                                  |
|------------------------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Dinner Plan Generator  | All      | AI-generated 7-day dinner plan. Busy Night flag for quick 20-min meals.                                                                                      |
| Medical+ Module        | Medical+ | Per-member medication profiles, allergy tracking, food-drug interaction detection, enforcement levels (Strict/Warn/Inform), Can I Have This scanner.         |
| Can I Have This?       | All*     | Type a food or scan any label. AI checks every family member's full medical and dietary profile. Per-member results. (*Full medical check requires Medical+) |
| Family Profiles        | All      | Up to 4 members. Per-member dietary restrictions enforced in all AI output. Medical+ adds medication/supplement profiles.                                    |
| Inventory Manager      | All      | Pantry/fridge/freezer tracking. Camera photo, receipt scanner, manual entry.                                                                                 |
| Leftover Scanner       | All      | Photo-based leftover identification, serving estimate, use-by date, consumption logging.                                                                     |
| Weekly Ad Scanner      | All      | Photo/screenshot upload of grocery ads. Meal plans built around sale items.                                                                                  |
| Receipt Scanner        | All      | Photograph receipts to auto-populate inventory.                                                                                                              |
| 5-Star Rating System   | All      | 1-5 star rating per meal. 5-star = 4-week rotation. 1-star = never again.                                                                                    |
| Substitute Tool        | All      | AI ingredient substitution respecting dietary restrictions.                                                                                                  |
| Make This              | All      | Step-by-step cooking instructions from any recipe card.                                                                                                      |
| Shopping List          | All      | Auto-builds from meal plan. Email to shopping partner or Shipt.                                                                                              |
| Google Calendar        | All      | Add any meal to Google Calendar with one tap.                                                                                                                |
| In-App Support Chat    | All      | Claude-powered draggable chat bubble. Escalates to email support.                                                                                            |
| Senior Mode            | All      | Enlarged text, simplified layout. Toggle in Settings.                                                                                                        |
| Viewer Code System     | All      | Share a code with family or caregivers for read-only access to your account.                                                                                 |
| Wild Harvest Inventory | All      | Inventory for hunters/anglers. 27 species with freezer life intelligence.                                                                                    |
| Home Harvest Inventory | All      | Inventory for gardeners. 40+ produce items, eggs, livestock, preserved goods.                                                                                |
| Harvest Label Printing | All      | Print Avery label sheets for Wild/Home Harvest items.                                                                                                        |
| 30-Day Free Trial      | All      | No credit card required. Countdown in Settings.                                                                                                              |
| Caregiver Report       | Medical+ | Remote dietary oversight — coming Phase 2.                                                                                                                   |
| SMS Shopping List      | Coming   | Twilio-based SMS delivery — Phase 2.                                                                                                                         |

| Feature      | Tier   | Description              |
|--------------|--------|--------------------------|
| Multilingual | Coming | Spanish first — Phase 3. |

## Account & Subscription

### Free Trial

All accounts begin with a 30-day free trial. No credit card is required. The trial countdown is visible in the Settings tab. Trial touchpoints appear at days 15, 10, 5, and daily thereafter. A Day 5 retention conversation is built into the support chat.

### Subscription Tiers

- Solo: \$7.99/month or \$49.99/year — 1 device, full AI meal planning, all core features
- Family: \$12.99/month or \$99.99/year — up to 4 family members, 3 devices, per-member dietary profiles
- Medical+: \$19.99/month or \$179.99/year — unlimited devices, full Medical+ Module, caregiver features

**PROMO CODE: SMG528 — \$5/month off first 12 months. Enter at Stripe checkout.**

## Medical+ Module

The Medical+ Module enables per-member medication management, allergy tracking, and food-drug interaction detection with per-member enforcement. It is fully live as of May 2026.

### Setting Up a Medical+ Profile

Open the Family tab, tap Edit on any family member, and scroll to the MEDICAL+ PROFILE section (red left border).

| Field                | How to Use                                                                                                                                                                                            |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Dietary Plan         | Select from 10 clinical plans: Diabetic-Friendly, Renal, Cardiac, Bariatric, Low Sodium, Low FODMAP, Mediterranean, Keto, Gluten-Free, or Custom (free-text description).                             |
| Allergies            | Tap any of 9 standard allergen buttons: Peanuts, Tree Nuts, Shellfish, Fish, Dairy, Eggs, Soy, Wheat/Gluten, Sesame. Add additional allergies in the free-text field (e.g. mango, latex).             |
| Medications          | Tap + Add Medication. Name field has autocomplete with 200+ drug database — type 2+ characters. Enter Dose (e.g. 5-325mg) and Schedule (e.g. 1 as needed, 2 daily, 1 nightly).                        |
| Supplements          | Tap + Add Supplement. Enter Name, Dose, and Schedule.                                                                                                                                                 |
| AI Enforcement Level | Set by parent or caregiver per member. Strict = AI never suggests conflicting meals. Warn = amber badge on meal card and recipe with member name and specific reason. Inform = educational note only. |

### Warn & Strict Badges

- Strict members: red  badge on the meal plan card — AI was instructed to exclude this meal
- Warn members: amber  badge on meal plan card AND inside recipe modal, showing member name and specific interaction (e.g. 'Sue — High vitamin K — may affect Warfarin')
- Inform members: no badge; AI may note interactions in recipe descriptions

*Interaction library covers: Warfarin/vitamin K, statins/grapefruit, opioids/grapefruit, ACE inhibitors/potassium, Metformin/alcohol, antidepressants/tyramine foods, Levothyroxine/cruciferous vegetables, corticosteroids/sodium.*

### Can I Have This?

The  Can I Have This? button appears in the top navigation bar next to Family Recipes for any account with Medical+ or dietary restrictions active.

| Method       | How to Use                                                                                                    |
|--------------|---------------------------------------------------------------------------------------------------------------|
| Type a food  | Enter any food or ingredient (e.g. grapefruit, spinach, aged cheddar) and press Enter or tap Check This Food. |
| Scan a label | Tap the photo zone. On mobile, camera opens directly. Photograph any food product label. Tap Check This Food. |

Results: overall verdict (Safe to Eat / Use Caution / Not Recommended) plus per-member breakdown. Example: 'Sue — Warfarin interaction with vitamin K in beans.'

### Dietary Restrictions — All Tiers

Dietary restrictions are available to all subscription tiers and enforced automatically in every AI prompt — meal plans, recipes, desserts, Make This, and Can I Have This.

| Restriction       | What the AI Enforces                                                      |
|-------------------|---------------------------------------------------------------------------|
| No Restrictions   | Standard meal planning, no dietary limits.                                |
| Standard Adult    | Balanced nutrition, moderate portions.                                    |
| Teen Athlete      | Higher protein, larger portions, performance nutrition.                   |
| Senior Adult      | Softer textures, smaller portions, nutrient-dense meals.                  |
| Diabetic (Strict) | Zero sugar, brown rice only, whole wheat pasta, low glycemic, low sodium. |
| Renal/Kidney      | Low potassium, low phosphorus, limited protein, low sodium.               |
| Diabetic+Renal    | All diabetic AND all renal restrictions combined.                         |
| Heart-Healthy     | Low saturated fat, low cholesterol, low sodium, heart-safe oils.          |
| Low Sodium        | Reduced sodium throughout; no high-salt processed ingredients.            |

### Meal Plan

The 7-Day Dinner Plan is generated by tapping Regenerate on the Meal Plan tab. The AI uses your inventory, family profiles, star ratings, and adaptive learning history.

- Busy Night Flag — tap  Busy? on any day to swap in a quick meal under 20 minutes
- Change Meal — swap any single day; rejection is logged for adaptive learning
- Made It — log a completed meal; builds adaptive preference history
- 5-Star Rating — 5 stars = Keeper (monthly rotation), 1 star = never suggest again
- Add to Calendar — adds the meal to Google Calendar with one tap
- Photo — take or change the photo on any meal card

### Inventory

- Manual entry — tap + Add and fill in name, category, location, quantity, unit
- Receipt Scanner — photograph a grocery receipt; AI auto-populates inventory items

- Shelf Scanner — photograph pantry shelf; AI identifies visible items
- Wild Harvest — category for hunted/caught protein (27 species with freezer life intelligence)
- Home Harvest — category for garden produce, backyard eggs, preserved goods
- Harvest Label Printing — print Avery 5160/5163/5164 label sheets for freezer bags and jars

## Shopping List

---

- Auto-generated from the current meal plan — items not in inventory appear as NEED
- Email — tap Shopping List to email the categorized list to yourself, a partner, or Shipt
- Print — print-ready list from the Shopping tab
- Build from Ads — generate a list based on scanned weekly grocery ads

## Viewer Code System

---

The Viewer Code System allows family members or caregivers to access your Smart Kitchen account in read-only mode.

- Owner: go to Settings, find the Viewer Code section, set a 4-12 character code, and share it
- Viewer: sign in or create a free account, enter the owner's code when prompted
- Viewers can see: meal plan, inventory, shopping list, family profiles (read-only)
- Viewers cannot: edit inventory, regenerate meal plan, change profiles, or access settings

## Senior Mode

---

Senior Mode enlarges all text, simplifies navigation, and adds proactive feature guidance. Toggle in Settings or tap the Senior button in the top navigation bar. Available to all subscription tiers.

## Support Chat

---

The support chat bubble (bottom right corner) is available to all tiers. It is powered by Claude and knows your family profile, inventory, and dietary restrictions. Tap the escalation option for email support.

## App Access & Settings

---

- Live URL: smart-kitchen-opal.vercel.app
- Platform: Progressive Web App (PWA) — works on any browser, any device
- Mobile: Add to Home Screen on iOS or Android for app-like experience
- Auth: Supabase secure authentication — email and password

## Settings Tab

- Toggle Senior Mode
- View trial countdown and subscription status
- Manage family member profiles and Medical+ data
- Set shopping list email address
- Set Viewer Code for family/caregiver access
- Cloud sync — Save to Cloud Now or Load from Cloud
