

Smart Kitchen™

Family Guide

Your Household Guide to AI-Powered Meal Planning — Version 10.1

How This App Started

This app started with a question I dreaded hearing.

Sue has been dealing with some things for a while now. Working from home sounds like it should make something like this easier. And in some ways, sure. But it also means there's no commute to decompress — the laptop closes and you're already standing in the kitchen. By that point in the day I've already made more decisions than I can count.

Sue would ask 'What's for dinner?' and I would get irritated. Not at Sue — never at Sue. Just at the question itself. One more decision at the end of a day that already had too many.

What if the app just knew what was for dinner? What if it looked at what was in the kitchen, knew who it was cooking for, knew which nights were slammed and which ones had a little room — and just handled it?

That's Smart Kitchen™. You two families are the first people I trusted with this. Your feedback — what works, what doesn't, what you wish it did — is what shapes everything that gets built next.

— Rick

What's New in Version 10.0

Feature	What It Does
★ Family Recipes	Add your family's own recipes by typing them in, photographing a handwritten card (multiple photos for multi-page recipes), or describing an idea and letting AI create the full recipe. Homey warm card design with Georgia serif font. Serves scaling, dish photo, print to PDF, seasonal rotation in meal plans.
★ Print Any Recipe	Print button on every recipe card — meal plan, recipes tab, desserts, saved, make this, and family recipes. Opens a formatted card ready to print or save as PDF. Works on phone and desktop.
★ Per-Day New Meal	Tap the New Meal button on any individual day to replace just that day's dinner without regenerating the whole week.
★ Senior Mode Everywhere	Aa button now scales text in the welcome screen, setup wizard, chat panel, and all recipe cards. Light and Dark mode available.
★ Account Creation in Wizard	First screen of setup now captures email and password to create your account. Confirmation email sent immediately from Smart Kitchen.
★ Instacart (Coming Phase 2)	"Order on Instacart" button will appear on your shopping list — one tap sends your full ingredient list to Instacart for delivery.

Kyle's Diabetic Profile — How It Works

AUTOMATIC COMPLIANCE — Kyle's diabetic-friendly profile means the AI uses brown rice instead of white rice, whole wheat pasta instead of regular, lower glycemic ingredients throughout, and reduced sodium — on every meal, every plan, without anyone asking. Set once. Enforced everywhere.

This is the core Medical+ feature. It's not a filter — it's built into the AI prompt so the substitutions happen before a suggestion is ever offered.

Coming in Phase 2: Unified Table. Kyle's version of a meal and the family version will appear side by side on the same card — same protein, same cook session, different plating. One dinner. Everyone at the same table.

★ NEW: Family Recipes — How to Use

Tap the Family Recipes button in the navigation bar (next to Make This).

- To add a recipe by typing:** Tap + Add a Family Recipe → Type it in. Fill in name, "From the kitchen of" (optional), ingredients (one per line), steps, servings, and family notes.
- To scan a handwritten recipe:** Tap Photo of a written recipe. Choose Take a Photo or Choose from Gallery. Add additional photos if the recipe spans multiple pages. Tap Read Recipe — Claude reads all photos and builds the card. Review and edit, then Save Recipe.
- To create from an idea:** Tap "I have an idea for a recipe." Describe it in your own words. Claude creates the full recipe card with proper ingredients, steps, and servings. Review, edit, then Save Recipe.

- To scale servings:** Open any family recipe card. Tap + or – on the Serves badge. Ingredient amounts adjust automatically.
- To add a dish photo:** Open the recipe card. Tap "Add a photo of this dish." Choose camera or gallery. Photo compresses and saves to the card.
- To print a recipe:** Open the recipe card. Tap Print Recipe. A formatted card opens ready to print or save as PDF.
- To add to meal plan rotation:** Open the recipe card. Tap Edit. Toggle "Include in meal plan rotation." Choose Weekly, Monthly, or Seasonal. For seasonal, select which seasons and holidays apply.

How the App Learns Your Family

Smart Kitchen gets smarter the longer you use it. Every interaction is a signal:

What you do	What it teaches the AI
Tap Made It on a meal	Logs that your family cooked it. Do it 2+ times and it becomes a household favorite.
Give a meal 5 stars	Saves it as a Keeper. Included in meal plans regularly on 4-week rotation.
Give a meal 1 star	Bans it from future suggestions. Check Saved tab to Restore if it was a mistake.
Tap Change Meal	Logs the rejection. Skip the same meal twice and it stops being offered.
Log a leftover as Used — Dinner	Confirms the leftover was eaten. Validates the portion size was right.
Log a leftover as Used — Lunch	Separate signal — the app learns this dish works well as next-day lunch.
Correct the bag count in Repackage	The yield difference is logged. Over time the estimates improve for your produce.
Don't rate a meal	No signal is sent. The AI treats it as neutral — it may appear again in future plans without any priority change. Rating is always optional.

What you do	What it teaches the AI
Add a Wild/Home Harvest item	AI schedules a meal around it before the freezer/shelf life expires.
Save a Family Recipe to rotation	AI suggests it during the week or season you've specified.

Quick Reference

Question	Answer
App URL	smart-kitchen-opal.vercel.app
How do I add a Family Recipe?	Family Recipes button → + Add a Family Recipe → choose Type, Photo, or Idea
How do I print a recipe?	Open any recipe card → tap Print Recipe (or Print button)
How do I scale servings?	Open family recipe card → tap + or – on the Serves badge
How do I add a recipe to rotation?	Family recipe card → Edit → toggle Include in meal plan rotation
How do I regenerate one day?	Tap the New Meal button on that day's card
How do I add a Wild Harvest item?	Inventory → + Add → Category: Wild Harvest → Location: Freezer or Fridge
How do I print freezer labels?	Inventory → green Print Labels button → select format → select items → Print Labels
How do I restore a rejected meal?	Saved tab → scroll to Rejected Meals → tap Restore
How do I scan a leftover?	Leftovers tab → Scan Leftover Container → photograph container → Identify & Save
How do I email the shopping list?	Settings → Shopping Partner → enter name and email → Shopping List → Email to [Name]
How do I turn on Senior Mode?	Tap the Aa button in the top right corner
How does cloud sync work?	Sign in on any device and your data loads automatically. It also saves every 90 seconds in the background.
How do I save to cloud manually?	Settings → Cloud Sync → Save to Cloud Now
How do I load from cloud manually?	Settings → Cloud Sync → Load from Cloud
What syncs across devices?	Inventory, meal plan, family recipes, star ratings, shopping list, preferences. Photos stay local.
How do I turn on Dark Mode?	Tap the moon/sun icon next to Aa
What if something doesn't work?	Tap the chat bubble bottom right • Or text Rick directly
