

Follow these 6 steps to set up your kitchen and get your first 7-day dinner plan.

1

Open the App

Type smart-kitchen-opal.vercel.app into any browser on your phone, tablet, or computer.

2

Create Your Free Account

Tap “Try Free for 30 Days.” Enter your email address and choose a password. Tap Show to make sure your password looks right. Tap Create My Free Account.

3

Confirm Your Email

Check your inbox for an email from Smart Kitchen. Open it and tap the gold “Confirm & Open Smart Kitchen” button. This brings you back to the app signed in.

4

Tell Us About Your Family

Tap “Family” in the menu. Enter how many people you’re cooking for. Add a name for each person if you like. Tap Save.

5

Add What’s in Your Kitchen

Tap “Inventory.” Add the proteins in your freezer — chicken, beef, pork, fish. Tap + to add each one with a quantity. The app builds meals around what you already have.

6

Build Your First Meal Plan

Tap “Meal Plan” then tap the gold “Build Meal Plan” button. In about 15 seconds, the app generates a full 7-day dinner plan built around your inventory and family. That’s it — dinner is decided for the week.

★ Three tips for your first week

- ✓ After you cook a meal, tap “Made It!” on the recipe card. The app remembers what you cook.
- ✓ Tap the stars to rate each meal. 5 stars = keep making it. 1 star = never suggest it again.
- ✓ Tap “Shopping List” to get a list of everything you need — emailed or texted right to your phone.

Need help? Tap the **chat bubble** in the bottom corner — your kitchen assistant is always there.
