About This Manual

This is the complete feature reference for Smart Kitchen™ v8.0. It documents all current features, settings, and operational details. Features new in v8.0 are marked ★ NEW.

FEATURE SUMMARY

Feature	Tier	Description
Dinner Plan Generator	All	AI-generated 7-day dinner plan. Busy Night flag for quick 20-min meals.
★ Occasion Planner	All	Plan special event meals — Dinner Party, Date Night, Birthday Dinner, BBQ, Kids Party, Pop Up. AI generates one occasion meal with make-ahead tips. Date picker slots into meal plan or pushes to Google Calendar.
★ SMS Shopping List	All	One-tap text message delivery of shopping list to any US phone number. Twilio background send or native Messages app fallback.
★ Date of Birth on Profiles	All	Age display, birthday countdown, 🎂 banner on meal plan week. Tap banner to plan birthday dinner via Occasion Planner.
★ Proactive Feature Chat	All	Chat auto-opens after new feature releases. Greets by name, describes feature, offers guided walkthrough via quick-reply buttons. Fires once per feature per device.
★ Bluetooth Scale	Medical+	Connect Etekcity ESN00 via Web Bluetooth. Live gram reading. Enter food name — AI returns calories, protein, carbs, fat, fiber, sodium instantly.
Can I Have This?	All	Scan any product label for dietary compliance. Returns Yes/No/In Moderation.
Family Profiles	All	Per-member dietary restrictions enforced in all AI output. Role, restriction, DOB, Medical+ fields.
Inventory Manager	All	Pantry/fridge/freezer tracking. Camera photo ID, receipt scanner, manual entry.
Wild Harvest Inventory	All	27 species with freezer life intelligence. Species-aware recipes auto-scheduled.
Home Harvest Inventory	All	40+ produce, eggs, livestock, preserved goods with shelf life tracking.
Harvest Label Printing	All	Avery 5160/5163/5164 label sheets for Wild and Home Harvest items.
Leftover Scanner	All	Photo-based leftover identification, serving estimate, use-by date, consumption logging.
Weekly Ad Scanner	All	Batch photo upload of grocery ads. Meal plans built around sale items.
Adaptive Learning	All	Made It, Change Meal, star ratings, leftover usage signals build household preference profile.
5-Star Meal Rotation	All	5-star = 4-week cooldown keeper. 1-star = never again. Max 3 keepers per week.

Feature	Tier	Description
Rejected Meals View	All	All banned meals with Restore button. Accessible from Saved tab.
Shopping List	All	Auto-builds from meal plan. Email, SMS, and print delivery. Restock queue integration.
Google Calendar	All	Add any meal to Google Calendar. Occasion meals auto-push when date is future.
In-App Support Chat	All	Draggable Claude-powered chat. Callback opt-in. Escalates to email support.
Senior Mode	All	Enlarged text, simplified navigation, Aa button toggle.
30-Day Free Trial	All	No credit card required.
Medical+ Profiles	Medical+	Per-member medication, allergy, supplement profiles. Enforcement levels: Strict/Warn/Inform.
Medical+ Planning	Medical+	Dietary plan selector: Diabetic-Friendly, Renal, Cardiac, Bariatric, Low Sodium, Low FODMAP, Mediterranean, Keto, Gluten-Free, Custom.

SUBSCRIPTION TIERS

Tier	Monthly	Annual	Members / Notes
Solo	\$7.99	2 months free	1 member
Couple	\$9.99	2 months free	2 members max
Family	\$14.99	2 months free	Unlimited members
Medical+	+\$10.00	+\$10.00	Add-on to any tier — household

★ NEW: OCCASION PLANNER

The Occasion Planner generates a single special-event meal with full AI context — event type, audience, head count, budget, and guest dietary needs — then schedules it into your meal plan or pushes it to Google Calendar.

Where to find it:

- Top bar — 🎉 Plan Occasion button (always visible)
- Meal Plan tab header — Plan Occasion button next to Regenerate
- Each meal day card — 🎉 Occasion button
- Recipes tab — 🎉 Occasion button

Step-by-Step

1	Name the occasion (optional) — type anything: "Anniversary dinner", "Backyard BBQ", "Liz's birthday". This text flows into the AI prompt.
2	Select Event Type — Quick (30 min), Casual (weeknight), Formal (elevated), Dinner Party (scaled 6-8+), or Pop Up (spontaneous).
3	Select Audience — Family, Kids Party, Date Night (auto-sets 2 people + wine pairing), Mixed Crowd, or Adults Party (21+ — BBQs, game days).
4	Set Head Count — defaults to your family size. Adjustable.
5	Choose Mode — Use What I Have (maximizes on-hand proteins and inventory) or Surprise Me (shops for something special).
6	If Surprise Me — select Budget: Under \$30 / \$30–\$60 / \$60–\$100 / No limit.

7	Guest dietary needs (optional) — free text, e.g. "nut allergy, one vegetarian guest".
8	Anything else? (optional) — e.g. "Something impressive but not fussy".
9	Tap Plan Occasion. AI generates one occasion-specific meal (30–60 seconds).
10	Review the result — meal name, description, time, servings, make-ahead tips (Dinner Party and Formal only), and shopping list for missing items.
11	Tap When is this? Pick Date — enter the occasion date.
12	Tap Schedule It. If the date falls in your current meal plan week, that day's dinner updates automatically. If future, Google Calendar opens pre-filled with the meal name and shopping list in the event description.

NOTE: Date Night automatically sets head count to 2 and adds wine/cocktail pairing context to the AI prompt. Kids Party disables alcohol suggestions and adds allergen-aware framing. Dinner Party adds make-ahead tips for up to 24 hours ahead.

★ NEW: SMS SHOPPING LIST

Send your full categorized shopping list as a text message to any US phone number with one tap.

Setup (one time):

- Go to Settings → Shopping Partner section
- Enter a phone number in the Phone for SMS shopping list field (e.g. 616-555-1234)
- US numbers only. Standard messaging rates apply.

Sending:

- Go to Shopping tab
- Tap the green Text to [phone number] button
- On mobile — your native Messages app opens with the full list pre-filled, grouped by category, ready to send
- On desktop — the list opens in your messaging app via the system app picker

Background SMS (optional) Desktop users can set up Twilio for silent background sending — no app picker needed. Tap 'Set Up Twilio (background SMS)' in Settings for a 4-step guide. Twilio free trial provides \$15 credit (~hundreds of messages). Takes 5 minutes.

★ NEW: DATE OF BIRTH ON FAMILY PROFILES

Each family member profile now supports an optional Date of Birth field.

What DOB enables:

- Age displays immediately on the profile card
- Birthday countdown appears when a birthday is within 30 days — gold text when within 7 days
- 🎂 Birthday banner appears on the Meal Plan tab during birthday week — tap it to open Occasion Planner pre-set to a birthday dinner
- Age-aware AI meal planning — toddlers get soft foods and small portions; seniors get easy-to-chew suggestions; children get kid-friendly portions automatically
- When a birthday is within 7 days, the AI prompt includes a birthday dinner recommendation for that week

How to add a DOB:

- Go to Family tab → tap any profile → scroll to Date of Birth (optional)
- Tap the date field — select month, day, year
- Age and countdown appear immediately

★ NEW: BLUETOOTH PORTION SCALE (MEDICAL+)

Connect a Bluetooth kitchen scale to weigh food portions and get instant AI nutrition estimates. Medical+ exclusive.

Compatible Scale Etekcity ESN00 Smart Nutrition Scale — ~\$25 on Amazon. Search "Etekcity ESN00 Smart Nutrition Scale". The Web Bluetooth integration is built and works on first connection. Works in Chrome and Edge on Android, Windows, and Mac. Does not work on iOS Safari.

How to Use:

1	Power on your Etekcity ESN00 scale. Make sure Bluetooth is enabled on your device.
2	Tap  Scale in the Smart Kitchen top bar (visible to Medical+ subscribers only).
3	Tap Connect Scale — your browser's Bluetooth device picker opens.
4	Select your scale from the list ("Etekcity Scale_ESN00").
5	Place food on the scale. The live gram reading updates in real time in the app.
6	Type what you are weighing in the food name field (e.g. "Chicken breast" or "Brown rice cooked").
7	Tap Estimate Nutrition. AI returns calories, protein, carbs, fat, fiber, and sodium for that exact portion in about 10 seconds.
8	Tap Disconnect Scale when done.

NOTE: Web Bluetooth requires Chrome or Edge on Android, Windows, or Mac. iOS Safari does not support Web Bluetooth. If you are on iOS, use Chrome on Android or a desktop browser to access the scale feature.

★ NEW: PROACTIVE FEATURE ANNOUNCEMENTS

After new feature releases, the Smart Kitchen support chat automatically opens and introduces the new feature by name.

- Chat opens 3 seconds after the app loads (after the setup wizard is complete)
- Greeting is personalized — uses your first name
- Quick-reply buttons appear below the chat message — tap to respond without typing
- Fires exactly once per feature per device — seen the message? It never shows again
- If you tap 'Show me!' or 'How does it work?' the AI walks you through the feature interactively

NOTE: If you want to see a feature introduction again, go to Settings → Reset All Data — this resets the seen flags along with all other data. For demos only.

SETTINGS — UPDATED

Setting	Description
Shopping Partner Name	Name of the person who receives the shopping list (email or SMS)
Shopping Partner Email	Email address for shopping list delivery via Resend
★ Phone for SMS Shopping List	US phone number for one-tap SMS shopping list delivery. Includes mobile vs desktop instructions.
★ Set Up Twilio	Opens 4-step guide to configure background SMS sending (optional, desktop users)

Setting	Description
Senior Mode	Toggle enlarged text and simplified navigation
Dark / Light Mode	Switch display theme
Recipe Search Site	Choose Google, AllRecipes, Pinterest, or Food Network for web recipe search
Reset Inventory	Clears all inventory items. Keeps profiles, meal plan, preferences.
Reset All Data	Wipes everything and restarts Setup Wizard. Use for demos.
