

Smart Kitchen™

Family Guide

Your Household Guide to AI-Powered Meal Planning

For Andrew & Leslie's Family • Liz & Kyle's Family • Version 9.0

smart-kitchen-opal.vercel.app

How This App Started

This app started with a question I dreaded hearing.

Sue has been dealing with some things for a while now. Working from home sounds like it should make something like this easier. And in some ways, sure. But it also means there's no commute to decompress — the laptop closes and you're already standing in the kitchen. By that point in the day I've already made more decisions than I can count.

Sue would ask 'What's for dinner?' and I would get irritated. Not at Sue — never at Sue. Just at the question itself. One more decision at the end of a day that already had too many.

THE IDEA	<i>What if the app just knew what was for dinner? What if it looked at what was in the kitchen, knew who it was cooking for, knew which nights were slammed and which ones had a little room — and just handled it?</i>
----------	---

That's Smart Kitchen™. You two families are the first people I trusted with this. Your feedback — what works, what doesn't, what you wish it did — is what shapes everything that gets built next.

— Rick

What Smart Kitchen Does

7-Day Meal Plan	One tap builds a full week of dinners around your inventory, family size, dietary needs, and what you've liked before.
Adaptive Learning — NEW	The AI learns what your family cooks, loves, and skips. After a few weeks it starts predicting what you want before you ask.
Wild Harvest — NEW	Andrew's venison, salmon, and panfish logged as inventory. The AI builds meals around what he brings home. Venison Meatballs showed up on day one.
Home Harvest — NEW	Garden produce, backyard eggs, preserved goods — all tracked with shelf life and surfaced before anything spoils.
Harvest Label Printing — NEW	Print Avery label sheets for freezer bags and canning jars. Item name, harvest date, best-by date, Smart Kitchen branding.
Leftover Scanner	Photograph a leftover container. App identifies the dish, estimates servings, sets a use-by date. Tap Used (Dinner or Lunch) or Remove — both logged for learning.
Yield Correction — NEW	After repackaging sauté blend bags, confirm actual yield. The app logs the delta and improves future estimates.
Busy Night Flag	Mark a hectic evening — the app swaps in a quick meal. Leftovers are used first before they expire.

Star Ratings	Rate any meal 1-5 stars. 1 star bans it from suggestions. 5 stars makes it a Keeper. The Rejected Meals view lets you undo any rating.
Change Meal	Swap any day's dinner. Rejected meals are logged — skipped twice means it joins the Never Suggest list automatically.
Shopping List Email	Set up a shopping partner in Settings — yourself, a partner, or a professional shopping service like Shipt. One tap emails the full categorized list.
Support Chat	Built-in AI support — tap the bubble in the bottom right. Knows your family profile and inventory.

Kyle's Diabetic Profile — How It Works

AUTOMATIC COMPLIANCE	<i>Kyle's diabetic-friendly profile means the AI uses brown rice instead of white rice, whole wheat pasta instead of regular, lower glycemic ingredients throughout, and reduced sodium — on every meal, every plan, without anyone asking. Set once. Enforced everywhere.</i>
----------------------	--

This is the core Medical+ feature. It's not a filter — it's built into the AI prompt so the substitutions happen before a suggestion is ever offered.

Coming in Phase 2: Unified Table. Kyle's version of a meal and the family version will appear side by side on the same card — same protein, same cook session, different plating. One dinner. Everyone at the same table.

Andrew's Wild Harvest — Getting Started

Wild Harvest is the inventory category built for hunters and anglers. Here's how to use it:

Step 1	Go to Inventory and tap + Add
Step 2	Enter the item name — 'Ground Venison', 'Salmon Fillets', 'Bluegill (Cleaned)'
Step 3	Tap Wild Harvest as the category
Step 4	Set location — Freezer for long-term storage, Fridge for this weekend's cookout
Step 5	Enter quantity and unit — '2 lbs', '4 fillets', '6 fish'
Step 6	Tap Add — the item is in inventory. Next meal plan will include a wild game meal.

Printing Freezer Labels

Once Wild Harvest items are in inventory, tap the green Print Labels button in the Inventory filter bar. Select Avery 5163 (10 per sheet, 4in x 2in) for freezer bags. Check the items you want to label. Tap Print Labels — a print-ready sheet opens in a new window with your printer dialog.

How the App Learns Your Family — New in v9.0

Smart Kitchen now gets smarter the longer you use it. Every interaction is a signal:

What you do	What it teaches the AI
Tap Made It on a meal	Logs that your family cooked it. Do it 2+ times and it becomes a household favorite.
Give a meal 5 stars	Saves it as a Keeper. The AI will suggest it again regularly.
Give a meal 1 star	Bans it from future suggestions. Check Saved tab to Restore if it was a mistake.
Tap Change Meal	Logs the rejection. Skip the same meal twice and it stops being offered.
Log a leftover as Used — Dinner	Confirms the leftover was eaten at dinner. Validates the portion size was right.
Log a leftover as Used — Lunch	Separate signal — the app learns this dish works well as next-day lunch.
Correct the bag count in Repackage	The yield difference is logged. Over time the estimates improve for your produce.

WHAT THIS MEANS IN PRACTICE	<i>After a few weeks, the app knows Andrew's household cooks venison regularly, that the kids love Chicken Fried Rice, that salmon got a 1-star and should never be offered again, and that Tuesday is always a Busy Night. The meal plan stops feeling like a suggestion and starts feeling like a decision the family would have made anyway.</i>
------------------------------------	---

Quick Reference

App URL	smart-kitchen-opal.vercel.app
How do I add a Wild Harvest item?	Inventory → + Add → Category: Wild Harvest → Location: Freezer or Fridge
How do I print freezer labels?	Inventory → green Print Labels button → select format → select items → Print Labels
How do I restore a rejected meal?	Saved tab → scroll to Rejected Meals → tap Restore
How do I scan a leftover?	Leftovers tab → Scan Leftover Container → photograph container → Identify & Save
How do I log a leftover as eaten?	Leftover card → tap Used → tap Dinner or Lunch
How do I correct a bag yield?	Repackage → enter counts → Confirm → enter actual bags → Save Bags
How do I email the shopping list?	Settings → Shopping Partner → enter name and email (yourself, partner, or Shipt) → Shopping List → Email to [Name]
How do I turn on Senior Mode?	Tap the Aa button in the top right corner
How do I start over?	Settings → Reset Inventory (keeps profiles) or Reset All Data (wipes everything)
What if something doesn't work?	Tap the chat bubble • Or text Rick directly
